SUMMARY

Recent Computer Science graduate building production-minded full-stack applications, support tooling, and developer-focused systems. Hands-on experience with React/Next.js, TypeScript, Python/FastAPI, SQL, REST APIs, Docker, CI/CD, authentication, language parsing, and static program analysis.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL, HTML5, CSS3

Web & Data: React, Next.js, FastAPI, Node.js, REST APIs, PostgreSQL, SQLite, Supabase, Prisma ORM

Engineering: Git, GitHub Actions, Docker, Postman, Linux, CI/CD, OOP, Data Structures & Algorithms, Agile/Scrum

EDUCATION

Metropolitan State University of Denver - Denver, CO December 2025

Bachelor of Science in Computer Science

Relevant Coursework: Software Development Methods, Database Systems, Computer & Network Security, Data Structures & Algorithms, Operating Systems, Principles of Programming Languages

SELECTED TECHNICAL PROJECTS

SignalDesk AI - Support Engineering Platform | React | TypeScript | FastAPI | SQL | Docker | CI

- Built a full-stack incident-triage platform that classifies support issues, retrieves relevant internal knowledge, and returns evidence-backed troubleshooting workflows with severity, confidence, and escalation signals.
- Implemented ticket persistence/history, REST APIs, automated backend tests, Docker configuration, and GitHub Actions CI for a production-style development workflow.

Game Groove - Full-Stack Board Game Discovery | Next.js | React | TypeScript | PostgreSQL | Prisma

- Built a responsive full-stack application for searching, exploring, saving, and managing board games with authentication and database-backed user features.
- Integrated BoardGameGeek APIs for search, game details, statistics, and trending data.

Language Parser & Interpreter | Python | Lexer | Recursive-Descent Parser | AST | Pytest

- Built a small interpreted language from scratch with a hand-written lexer, recursive-descent parser, explicit AST, and execution engine supporting variables, expressions, conditionals, loops, and structured errors.

Static Analysis / AST Tool | Python | AST | CLI | JSON | CSV | Pytest

- Built a static-analysis CLI that inspects Python without executing it, extracting functions, classes, parameters, imports, assignments, calls, and per-function complexity metrics with JSON/CSV output.

LEADERSHIP & PROFESSIONAL EXPERIENCE

Scrum Team Lead / Developer - Senior Experience Project, MSU Denver 2025

- Led a six-person student team through sprint planning, task coordination, Git workflows, integration testing, and delivery of a collaborative software project.

Instacart Shopper 2021-2025

- Managed time-sensitive customer orders independently and resolved substitutions, availability changes, and delivery issues through clear real-time communication.

Package Handler - FedEx 2020

- Worked accurately in a high-volume team environment while following operational procedures and meeting strict processing deadlines.
